

Reg. No. :

Name :

First Semester M.C.A. Degree (Reg./Supple./Imp.) Examination, January 2017
(2014 Admn. Onwards)

**MCA 1C02 : DIGITAL SYSTEMS AND INTRODUCTION TO
 MICROPROCESSORS**

Time : 3 Hours

Max. Marks : 80

- Instructions :** 1) *Section – A : Answer any ten questions. Each question carries three marks.*
 2) *Section – B : Answer all questions. Each question carries ten marks.*

SECTION – A

Answer **any ten** questions, each question carries three marks.

1. Convert $(0.6875)_{10}$ to binary.
2. Explain distributive law of Boolean algebra.
3. Give the truth table of half subtractor.
4. Write a note on decoders.
5. With a block diagram explain combinational circuit.
6. Write a note on shift registers.
7. State various applications of shift registers.
8. Compare synchronous and asynchronous counters.
9. How transistor can be used as a switch ?
10. Define propagation delay.
11. Write a note on function of the address bus and the direction of the information flow on the address bus.
12. Explain the complete functioning of the following instructions in 8085 processor :
 - i) SUB B
 - ii) RST 1.

SECTION – B

Answer all questions, each question carries 10 marks.

13. a) i) Convert the following expression into SOP form $f(A, B, C) = A + ABC$. 5
 ii) Simplify the expression $AB + \overline{AC} + \overline{ABC}$ ($AB + C$). 5
 OR
 b) i) Convert the given expression into standard POS form $Y = A \cdot (A + B + C)$. 5
 ii) Prove that $(a + b)(\bar{a} + c)(b + c) = (a + b)(\bar{a} + c)$. 5
14. a) i) Reduce the following using K-map technique :
 $f(A, B, C, D) = \overline{A} \overline{B} D + A \overline{B} \overline{D} + \overline{A} B D + A B \overline{D}$. 5
 ii) With the help of a neat diagram explain design of a BCD adder circuit. 5
 OR
 b) i) Simplify the following using K-map technique :
 $Y = (\overline{P} + Q + \overline{R})(P + Q + R)(P + Q + \overline{R})$. 5
 ii) Implement the following Boolean function using 8 : 1 MUX :
 $F(P, Q, R, S) = \sum m(0, 11, 3, 4, 8, 9, 15)$. 5
15. a) i) What is a sequential circuit ? Discuss the different types of sequential circuits. 5
 ii) Explain the working of Johnson counter. 5
 OR
 b) i) Explain the operation of the master-slave J-K flip-flop along with its circuit diagram. 5
 ii) Draw and explain 4-bit serial in parallel out shift register. 5
16. a) i) Draw and explain the basic CMOS inverter circuit. 5
 ii) Describe the characteristics of TTL family. 5
 OR
 b) i) Give the comparison between TTL and CMOS families. 5
 ii) Explain the following :
 A) Fan-out B) Fan-in C) Noise margin. 5
17. a) i) With the help of a block diagram explain the architecture of intel 8085. 10
 OR
 b) i) Explain various addressing modes in 8085. 5
 ii) Explain subroutines in 8085. 5
